

LUXEFILMS® STREAMS OF LIGHT HOLOGRAFIK™

SPECIALTY THERMAL OVERLAMINATE FILM

LuxeFilms® Streams of Light Holografik™ overlamine film, is a clear overlamine featuring a vibrant light band pattern. The effect is an engaging visual display of light and color that draws attention and highlights the graphic elements of the printed piece. **Streams of Light Holografik™** boasts a seamless pattern so the eye cannot detect where the pattern repeats.

As a PET thermal overlamine film, **Streams of Light Holografik™** adheres to most print substrates while performing beautifully in post press applications such as die-cutting, folding, gluing, stamping and spot UV finishes. **Streams of Light Holografik™** stellar performance makes it an excellent finish for folding cartons, labels, book covers and POP displays.

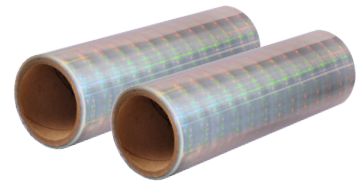

Finally, because **Streams of Light Holografik™** is a clear overlamine product, it can be layered over other select LuxeFilms® laminate films. A brilliant example would be in layering over Luxefilms® Mirror Metalized™ brilliant silver laminate film for an added metalized effect while also protecting the surface of the Mirror Metalized™ laminate film.

KEY BENEFITS

- Can Combine with Many LuxeFilms® Laminate Films
- Emboss-Friendly
- Glueable and Stampable
- 100% Total Satisfaction Gold Seal™ Guaranteed

SUGGESTED USES

- Point of Sale Displays
- Book Covers
- Slip Cases
- Premium folding Cartons
- Gift Packaging
- Consumer Goods Packaging
- Cosmetic and Jewelry Packaging
- Electronics Packaging
- Liquor and Luxury Product Packaging
